

IrrigationCaddy

EXP-800

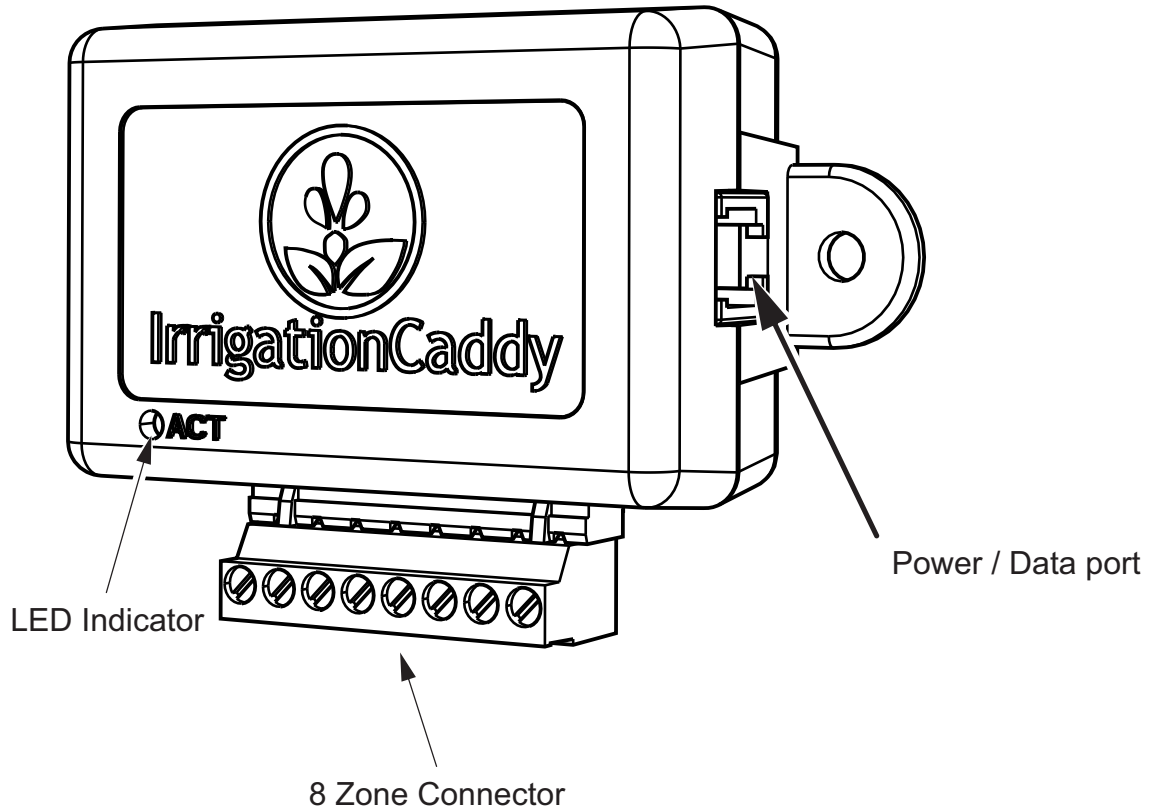

8-Zone Expansion Module

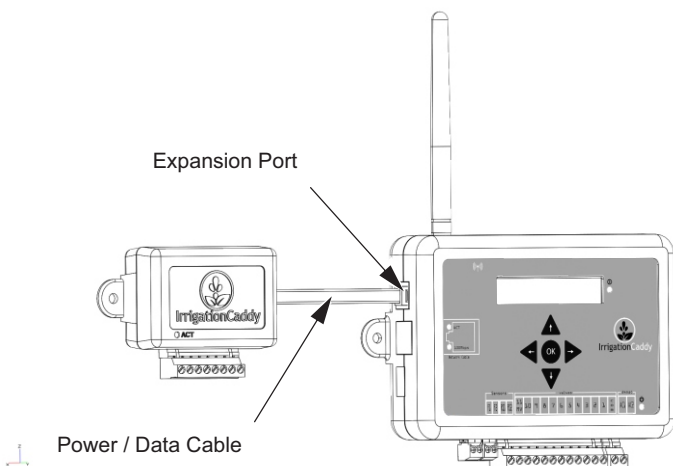

Owner's Manual and Installation Instructions

INTRODUCTION

The EXP-800 8 zone expansion module can be used to expand the number of zones available to the IrrigationCaddy W1 Web Based Irrigation Controller.

INSTALLATION

Using the Power / Data Cable provided, insert one end in to the EXP-800 Power / Data port, and the other end into the IrrigationCaddy's Expansion port.

If more than one expander is required, an expansion hub (H-500), is required in order to support multiple expansion modules.
